

Brass plug M10

The brass plug, as a corrosion resistant anchor, offers a solution for fixing light and medium loads indoors and outdoors. It ensures high pull-out values and anti-rotation lock through the fine-running tapered thread as well as a highly knurled outer surface. No special setting tool is necessary, since the spreading takes place by screwing in with a metric screw. The setting depth of the metric screw matches approximately the anchor length (also depends on solidity of base material).
