Nylon plug F8

The CELO nylon plugs are ideal and efficient for fastening light to medium loads.
The standard plug is ideally suitable for solid base materials, but achieves also good load values in perforated bricks and aerated concrete. Due to the high expansion ability, the CELO standard plugs achieve high pull-out loads. Because of the very good screw guidance, the screw cannot move out of the plug during the screwing in. The wings at the plug cause a good twist resistance in the drill hole. In addition, the strong design prevents bending when hammered in. The plug consists of high quality and ageing resistant nylon.
