

## Double thread screw zinc M8x200

The upper part of the hanger bolt has a thread with Torx head and the lower part has a wood thread. The 2 thread types are separated by a hexagonal middle section. This middle section makes it possible to tighten the screw with a spanner. The wood thread can be fixed faultlessly in wood or, with the help of a plug, in concrete. Rofix pipe brackets, among others, can be easily attached to the thread.
